MI Technical Solutions Connects with Future Innovators at the 2026 Worlds of Work Expo

Chesapeake VA, October 21, 2026 - MI Technical Solutions (MITS) participated in the 2026 Chesapeake Works The Worlds of Work (WOW) Career Expo's two-day event. The expo introduced students to exciting career opportunities throughout Hampton Roads, connecting the next generation of professionals with local employers and industries.

As a technology-focused company supporting innovative solutions for government and commercial customers, MITS recognizes the importance of inspiring young minds to explore careers in Science, Technology, Engineering, and Mathematics (STEM).

This year, the MITS Team offered students hands-on experiences featuring small robotic vehicles designed to navigate a track using sensors and programming. Students had the opportunity to explore how technology-enabled vehicles follow a designated path, recognize color-coded signals, and respond to changing conditions. In addition to robotic cars, students had an introduction to Additive Manufacturing (AM) (3-D printing), focusing on how the technology can be used in conjunction with programming and other technologies. These activities demonstrate the importance of problem-solving, creativity, and teamwork — all skills essential to success in today's evolving workplace!

For additional event information, please visit the Hampton Roads Workforce Council at: Worlds of Work.
